The **Mobile Personal Suburbanification Device (M.P.S.D.)** focuses on the lack of human interaction and our existence in a world where our relationship to nature has been replaced by manufactured habitats. The piece addresses our basic need for personal space and the compromises we are forced to make to coexist in the contemporary metropolis.

The **M.P.S.D.** is conceived as a series of guerilla performances on city sidewalks. These small portable performance sculptures are carried and “deployed” by performers on sidewalks and plazas.

What is SATISFIXATION? We are: Solving Today’s Problems....Tomorrow!

Utilizing a corporate alias, **Satisfixation LLC** produces performance-based mechanical sculptures that examine social dysfunction as a consequence of over-reliance on technology and the stresses posed by an increasingly urbanized world. Aided by volunteer participants and spectator interaction, these performances explore the urban landscape showcasing impractically designed products for a not-too-distant future.

The works in the ***Mobile Personal Series*** occur outdoors in urban environments with moderate to high foot traffic. Open to the public without admission. The pieces occupy sidewalks and other primarily concrete environments. The performances are unscripted and intended to confront viewers in their everyday environments by disrupting the flow of their routines.
